PRICE LIST

CATALOGED

1912-1913

CALIFORNIA NURSERY COMPANY

NILES, CALIFORNIA

TO CORRESPONDENTS

1st. This catalog eancels all previous prices, either in special lists, offers or catalogs. This rule will be strictly observed.

ORDERS.

2d. Order early so that you may get the varieties and grades you prefer. All orders should be legibly written on a separate sheet and not mixed up in the body of the letter, thereby saving us a great deal of trouble and tending to prevent mistakes. Never write on both sides of paper.

QUANTITIES AND PRICES.

3d. The articles in the following list will be furnished at the annexed prices ONLY when the quantity specified shall be taken. Five hundred, however, will be furnished at the thousand rate, fifty at the hundred rate and five at the ten rate. The absence of a thousand, hundred or ten rate means in each case that the next best rate is the lowest we can make. In no case does this mean so many trees of assorted classes, but refers only to ONE CLASS of assorted varieties; for instauce, 5 apples, or 5 pears, or 5 plums, of different varieties, but not 2 apples, 2 pears and 1 plum.

SUBSTITUTIONS.

4th. Where particular varieties are ordered, and particular ages and sizes of trees, kind of stock, etc., it should be stated whether, and to what extent, substitution will be allowed in case the order cannot be filled to the letter. Where no instructions in this respect accompany the order, we shall feel at liberty to substitute other varieties as nearly similar as possible. If the selection of the varieties is left entirely to us, we shall endeavor to send only such sorts as are acknowledged to give general satisfaction.

PACKING.

5th. All trees and plants are carefully labeled, and securely packed in the best manner, for which a moderate charge, sufficient to cover cost of material only, will be made; but no charge is made for the delivery of packages to the railroad or express offices at Niles.

EXPRESS OR FREIGHT.

6th. Always state which way you want your order shipped and give explicit directions for marking packages.

When it is left for us to choose the mode of conveyance, we will exercise our best judgment; but as all articles are at the risk of the purchaser after being shipped, we must not be held responsible for any loss or delay that may occur through the negligence of the transportation companies.

GUARANTEE, ETC.

7th. We warrant all trees and plants to be good, thrifty and true to label, but having no control over them after delivery to the transportation companies, or over the planting and care afer they are received by the buyer, we will not be responsible in any other direction than as stated, and accordingly, if any tree or plant should prove untrue to kind, we will either replace the same or refund the amount paid; but in no case will we be liable for any sum greater than that originally paid, and this statement is due notice to buyers of the extent of our responsibility for trees and plants after delivery of the same shall have been accepted by the buyer.

REPLACING.

8th. For the reason that we have no control over the planting, pruning and care of the trees after they leave our hands, wo will not under any circumstances replace any trees that may die.

ERRORS AND SHORTAGES.

9th. Customers are requested to notify us immediately should any error or shortage occur in filling their orders so we may rectify it at once. Any such claim must be made within one week after receipt of shipment; otherwise it will be assumed that the goods are satisfactory and in accordance with invoice.

C. O. D. AND STRANGERS.

10th. Orders from unknown correspondents must be accompanied by the cash or satisfactory rence. Orders to be sent C. O. D. must be accompanied by at least one-half the amount in cash; reference. Orders to be sent C. O. D. motherwise they will not receive attention.

REMITTANCES.

11th. Remittances may be made by check or draft on San Francisco banks, Express or Post-office money order on Niles, by registered letter or cash by express prepaid.

WRITE PLAINLY.

12th. Always be sure to write your name, Postoffice address and Express or Freight office plainly so no mistaké can be made by us.

All communications should be addressed to

PRICE LIST

SEASON 1912-1913

ALL PRICES QUOTED ARE NET-NO DISCOUNTS

INDEX AT END OF CATALOG

Fruit and Ornamental Trees

Evergreens, Palms, Shrubs, Roses, Etc.

We present herewith our price list for the coming season (twenty-eighth edition). Our nurseries are the most compete on the Pacific Coast. Our shipping facilities are unexcelled both for domestic and foreign business. For many years we have led in introducing and testing, under California conditions, the most promising foreign and other new varieties of fruit. We have in actual bearing here at Niles our own trees of every variety we offer for sale. Probably no other nursery can cut their buds from their own fruiting trees. Our buds and cions are taken from these bearing trees, cut and distributed by one man, making the mixture of varieties well nigh an impossibility. The unequaled reputation which our trees have, not only on the Pacific Coast, but in almost every country in the world, is an indication of the great care we exercise in every detail of our chosen line of work.

All interested parties, whether intending to purchase or not, are invited to visit the nursery, and if we are notified of time of arrival at Niles, and number of persons coming, will have conveyance at station to meet them.

CALIFORNIA NURSERY COMPANY.

Niles, November 1, 1912.

OFFICERS.

Egbert B. Stone, President. F. W. Hosmer, Secretary.

A. C. Hammond, Vice-President. Central National Bank, Oakland, Treasurer.

DIRECTORS:

Stuart S. Hawley, Oakland.
A. C. Hammond, San Francisco.
Egbert B. Stone, Elmhurst.

You W. H. Henn, San Francisco.
W. H. Landers, San Francisco.
R. M. Sims, San Francisco.

W. V. Eberly, Niles.

SPECIAL NOTICE (SHIPPING)

We are now able to ship from Niles by both the Western Pacific and the Southern Pacific, and request customers who can get their goods by either road to always state which route they prefer.

HINTS ON TRANSPLANTING

The many excellent treatises on Fruit Culture which have appeared within the past few years—one or more of which should be in the hands of every person intending to plant—render it almost unnecessary to give any directions in that line; yet we are so frequently asked for advice in this way, that we offer a few general remarks.

The situation of the orchard having been decided on, the ground should be deeply plowed, subsoiled and thoroughly pulverized. The holes should be dug at least a foot larger in every direction than actually required by the roots when spread out in their natural position. In planting, the top soil should be broken down into the hole, and worked carefully in between every root and fiber, filling up every crevice, that every root may be in contact with soil, and the whole made quite firm as the filling up progresses. The tree, when planted, may in light soils stand from two to three inches deeper than it stood in the nursery; but in heavy clay or wet ground it is advisable to have it stand at the same height as it was before transplanting.

On account of our long, hot dry summers, it is well to shade the sunny side of the tree, to keep borers out, with a board or shake stuck in the ground, or a piece of burlap wound loose around the tree up to the limbs, top tied loose with a string. Whitewash made out of whiting or lime will also protect the tree against sun-scald.

See back of Catalog for list of useful horticultural books we have on hand for sale.

Rule—Square Method—Multiply the distance in feet between the rows by the distance the plants are apart in the rows, and the product will be the number of square feet for each plant or hill, which, divided into the number of feet in an acre (43,560), will give the number of plants or trees to the acre.

Rule—Equilateral Triangle Method—Divide the number required to the acre "square method" by the decimal .866. The result will be the number of plants required to the acre by this method.

FRUIT DEPARTMENT

All our Fruit Trees are grown on whole Seedling roots. The advantages of these in promoting the health and thriftiness of trees over others grafted on pieces or sections of roots, or budded on stocks grown from cuttings, is acknowledged by the best authorities, and is easily apparent to the most casual observer. All two-year-old trees are branched low and are stocky, having been cut down or headed back when yearlings, two feet above ground, except where noted.

Although we quote fruit trees by height, it is to be understood that we will include in each grade any trees which are as stocky as the average of that grade, even if they do not fully attain the specified height.

All of our Apple Trees and Grape Vines are funigated with hydrographic gas when due as are

All of our Apple Trees and Grape Vines are fumigated with hydrocyanic gas when dug, so are the buds, cions, and cuttings, prior to budding, grafting, or planting out in Nursery. This positively kills any insects that may be thereon, without injury to trees or vines. We have a Fumigating House, with three compartments, so that we can disinfect, at any time, either 50 trees or 10,000.

ORNAMENTAL DEPARTMENT

From here on all items are listed under same names and arranged precisely as in our No. 2 catalog (describing ornamental trees and plants). The latter is the most complete and accurate publication of its kind ever issued on this Coast. While its price is 25 cents, we will gladly send a complimentary copy on request to any interested customer. It is invaluable to any one planting ornamental stack. mental stock.

All plants in this division have been once or more transplanted, which contributes greatly to the certainty of their growing. Balled trees and plants should always be set without removing the hurlap from the roots.

In cases where items are quoted only "per 10" or "per 100," we will not accept orders for less than 5 and 50 respectively.

NOTICE.

Where we catalog and specify SIZE OF BOXES, it means that the trees or plants so listed are already dug and have heen established in boxes for at least six months. Such plants, as well as those in pots, can he shipped and planted at any time of the year. BOXED means that the plants so quoted are in the field and of such size that it is necessary to dig them into boxes.

CONIFEROUS EVERGREENS

This section includes only evergreen conifers. Other evergreen trees and shrubs, usually called "Broad-leaved Evergreens," are listed separately in the next division, commencing at page 18.

HEDGE PLANTS

The following list includes plants suitable for this purpose. Sizes and prices are shown on pages noted below:

Acacia longifolia (latifolia)	Euonymus japonicus and all	Myrtle (all varieties) 27
and armata18-19	its varieties 24	Nandina domestica 27
Berberis darwini 20	Heath (Mediterranean) 24	Oleander (all varieties) 27
Box (all varieties) 20	Laurel (English and large	Pine—Monterey (for tall
Cherry (Evergreen) 21	leaved 25	hedges) 15
Christmas Berry 21	Laurustinus (all varieties) 26	Pittosporum crassifolium,
Cotoneaster angustifolia 22	Ligustrum ovalifolium (Cal-	eugenioides and nigricans 28
Crataegus pyracantha, la-	ifornia Privet) 26	Quince (Japanese Scarlet) 38
landi and crenulata 22	Melaleuca decussata and	Spruce (Norway) 17
Cypress (Monterey) 14	ericifolia27	Veronica (all varieties) 28
Escallonia berteriana, leu-		Yew (English) 18
cantha and rubra 23		. 3

DECIDUOUS ORNAMENTAL TREES

Please note that all trees in this class over 12 to 14 feet tall are graded and quoted according to their diameter measured at 4 feet above the ground. As a rule such trees have been headed back to 9 feet and have good heads. With proper planting and after-care there should be little or no loss in using these large trees.

Beloit—A very large flower of toward the center.	splendid form. Rich purplish-gara	iet, dee	pening to	crimson
	tems wiry, holding the flowers well s for cutting.	above t	he foliage.	One of

the most valuable varieties for cutting.

Le Grand Manitou—A fine large dahlia, 5 to 6 inches across. White, striped and blotched with deep reddish maroon.

Perle de Lyon—A splendid variety, which will become one of the leading sorts for cutting. Perfect in form. Pure white; petals beautifully frilled on the tips.

Yellow Colosse—Flowers are rich yellow, globular, and very large.

Nerthus—Flowers from 5 to 6 inches in diameter. Center orange yellow, shading to bronze; rosy-carmine at the tips. A fine variety for the garden and beautiful for decorating. Purity—In this variety we think we are offering the ideal Cactus. Flowers large, of splendid form and with very long, graceful petals. Excellent for cutting. Rheinkonig—Pure snow-white. Spleudid form and good substance.

Wodan—This is the strongest grower in our collection, attaining a height of six feet. Large flowers, which extend well above the foliage. Delicate salmon-rose, shading to oldgold in center. Semi-incurved, tubular petals.

Wolfgang von Goethe—A splendid large, free-flowering variety. Petals perfectly arranged, making it a very attractive flower. Rich carmine, shading to apricot in center.

ROSES

Our soil and climate are ideal for growing rose plants. Those offered are two years old and have been grown entirely in the open ground. They have all bloomed the past season, and with any reasonable care can hardly fail to bloom again the first season after planting.

For more detailed descriptions of the varieties in "General Collection" see the rose section of our Catalog No. 2, which will be sent on request to any customer.

NOVELTIES

SUNBURST, \$1,50.

A magnificent yellow, shaded orange copper; long buds on long stems; flowers very large; unusually vigorous and healthy. Has scored highest honors wherever exhibited, and will attain instant popularity. The coming yellow.

LADY HILLINGDON, \$1,25.

A fine, deep yellow variety; buds graceful and ender; very free bloomer. Foliage narrow; slender; very free bloom growth free and vigorous.

ROSE QUEEN, \$1.00.

Color is much the same shade of pink as Mad.

Caroline Testout, with yellow at base of petals. Buds very beautifully formed and intensely colored; borne on long stems. Particularly fine for cutting.

*MOSCHATA, \$1.00.

Flowers creamy white, single, similar to those of the Cherokee and possessing a musky fragrance. A strong climber.

LYON, 75c.

The greatest and most beautiful rose of the century. Coral red or salmon pink; chromc yellow at center and shrimp pink at the tips.

NEW AND SCARCE VARIETIES

50c each.

Helen Good (T.). A rose that has all the good points of the Cochets. The buds are of exquisite form; color is a delicate yellow, suffused with pink, with deeper edgc.

Joseph Hill (H. T.) Pink, shaded salmon; outside of petals coppery pink. Blooms very large, full and of perfect form. A superb

variety.

variety.

Mrs. David Jardine (H. T.) A glorious and most charming rose, possessing vigorous and erect growth, together with marvelously free flowering habit. The blooms, which are produced on every shoot, are of very large and perfect form; beautiful in its several stages of development. The color is a delightful shade of bright rosy pink, shading in outer petals to salmon pink.

Mrs. Myles Kennedy (H. T.) Delicate silvery white shaded buff, deeper pink in center, with back edge of petals slightly deeper shade of

pink. A most beautiful, distinct and charming addition.

My Maryland (H. T.). A grand pink variety that has come to the front with great strides. A splendid bloomer and superb rose.

Niles Cochet (T.). Red on edge of petals, pink at base; a sport from Maman Cochet. It has developed to be far superior to any of the other Cochets, being a much better bloomer and of finer color and substance.

*Pink Cherokee. A pink flowering form of the Single Cherokee rose. Possesses all the merits of the original.

Rhea Reid (H. T.) Rich, dark, velvety red; full, double flowers of good form and as fragrant as La France. A rose of great excellence.

ence.

White Killarney (H. T.) A pure white sport from Killarney, identical with its parent except in color.
